

WEB TECHNOLOGY AND MOBILE APPLICATION

EXPERIMENT 10

FontColorToastApp

AIM

To develop an Android application that:

- Changes the font style of a TextView
- Changes the text color
- Displays a Toast message when a button is pressed

STEP 1 – Create New Project

1. Open Android Studio
2. Click New Project
3. Select Empty Views Activity
4. Click Next

STEP 2 – Fill Project Details

Fill exactly like this:

Field	Value
Name	FontColorToastApp
Package Name	com.example.fontcolortoastapp
Language	Java
Minimum SDK	API 21

Click Finish

Wait until bottom shows:

Build Successful

STEP 3 – Understand Project Structure

On the left side:

Set view to Android

You will see:

app

├── java

| └── MainActivity.java

├── res

| └── layout

| └── activity_main.xml

STEP 4 – Design Layout (XML)

Go to:

res → layout → activity_main.xml

Click Code (top right)

Delete everything and paste this:

```
<?xml version="1.0" encoding="utf-8"?>
```

```
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
```

```
    android:orientation="vertical"
```

```
    android:gravity="center"
```

```
    android:padding="20dp"
```

```
    android:layout_width="match_parent"
```

```
    android:layout_height="match_parent">
```

```
<TextView
```

```
    android:id="@+id/textView"
```

```
android:text="Hello Android!"
android:textSize="24sp"
android:textStyle="normal"
android:textColor="#000000"
android:layout_width="wrap_content"

android:layout_height="wrap_content"/>

<Button
android:id="@+id/button"
android:text="Change Style"
android:layout_marginTop="20dp"
android:layout_width="wrap_content"
android:layout_height="wrap_content"/>

</LinearLayout>
```

Press Ctrl + S

STEP 5 – Write Java Code (Logic) (check project files)

Now open:

java → com.example.fontcolortoastapp → MainActivity.java

Delete everything and paste this:

```
package com.example.fontcolortoastapp;

import android.graphics.Color;
import android.graphics.Typeface;
```

```
import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.TextView;
import android.widget.Toast;

import androidx.appcompat.app.AppCompatActivity;

public class MainActivity extends AppCompatActivity {

    TextView textView;

    Button button;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        textView = findViewById(R.id.textView);
        button = findViewById(R.id.button);

        button.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View v) {
```

```
// Change text color
textView.setTextColor(Color.RED);

// Change font style
textView.setTypeface(null, Typeface.BOLD_ITALIC);

// Show Toast message
Toast.makeText(MainActivity.this,
"Font and Color Changed!",
Toast.LENGTH_SHORT).show();
}
});
}
}
```

Press Ctrl + S

STEP 6 – Run the Application

1. Click Device Manager
2. Create device (Pixel 4)
3. Click Green ► Run button
4. Wait for emulator

OUTPUT

App Screen Shows:

- A TextView → "Hello Android!"

- A Button → "Change Style"

When button is pressed:

Text becomes Red Color

Text becomes Bold Italic

Toast message appears:

"Font and Color Changed!"
