

WEB TECHNOLOGY AND MOBILE APPLICATION

EXPERIMENT 7

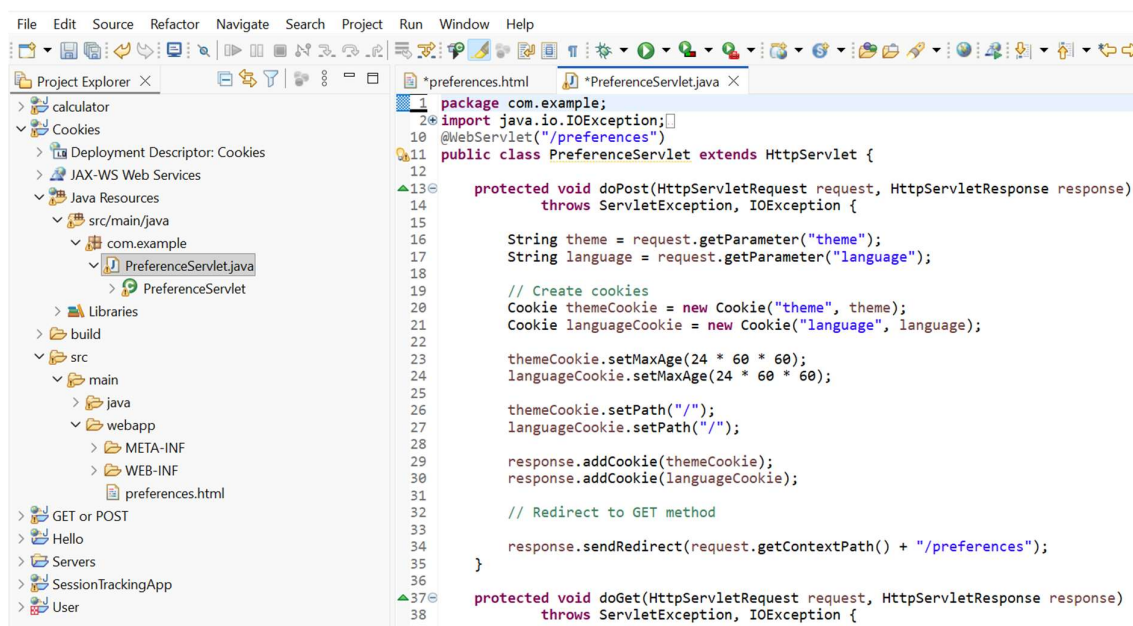

Cookies Management Using Java Servlets

CODE:

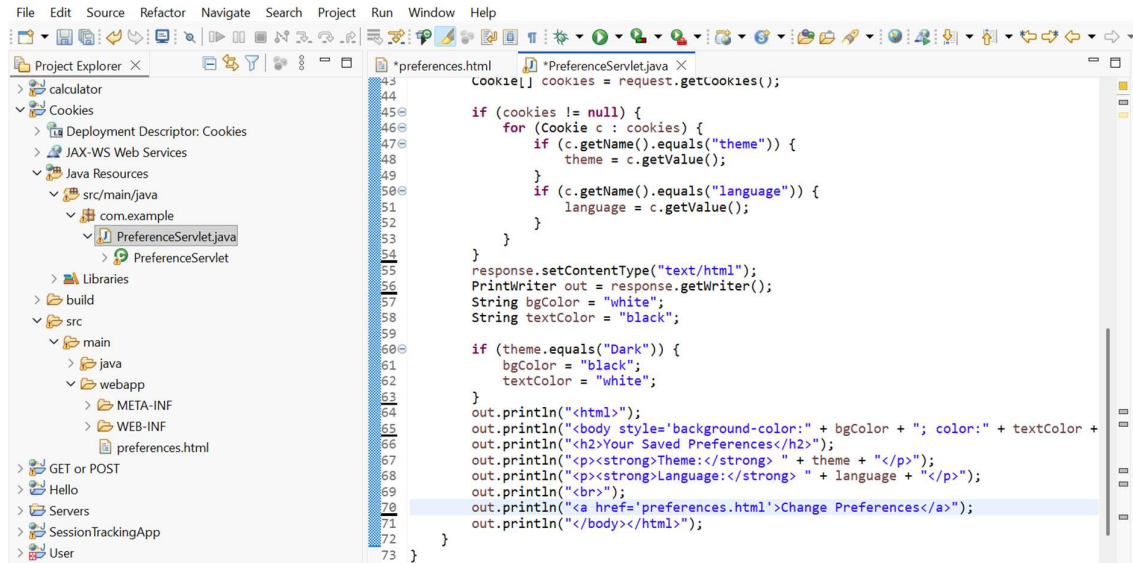

The screenshot shows an IDE with the 'preferences.html' file open. The Project Explorer on the left shows a project structure with a 'src/main/webapp' directory containing 'META-INF', 'WEB-INF', and 'preferences.html'. The main editor displays the following HTML code:

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4 <title>User Preferences</title>
5 </head>
6 <body>
7
8 <h2>Select Your Preferences</h2>
9 <form action="preferences" method="post">
10
11
12 Theme:
13 <select name="theme">
14 <option value="Light">Light</option>
15 <option value="Dark">Dark</option>
16 </select>
17 <br><br>
18 Language:
19 <select name="Language">
20 <option value="English">English</option>
21 <option value="Tamil">Tamil</option>
22 <option value="Hindi">Hindi</option>
23 </select>
24 <br><br>
25 <input type="submit" value="Save Preferences">
26 </form>
27 </body>
28 </html>
29
```

The screenshot shows an IDE with the 'PreferenceServlet.java' file open. The Project Explorer on the left shows a project structure with a 'src/main/webapp' directory containing 'META-INF', 'WEB-INF', and 'preferences.html'. The main editor displays the following Java code:

```
1 package com.example;
2 import java.io.IOException;
10 @WebServlet("/preferences")
11 public class PreferenceServlet extends HttpServlet {
12
13     protected void doPost(HttpServletRequest request, HttpServletResponse response)
14         throws ServletException, IOException {
15
16         String theme = request.getParameter("theme");
17         String language = request.getParameter("language");
18
19         // Create cookies
20         Cookie themeCookie = new Cookie("theme", theme);
21         Cookie languageCookie = new Cookie("language", language);
22
23         themeCookie.setMaxAge(24 * 60 * 60);
24         languageCookie.setMaxAge(24 * 60 * 60);
25
26         themeCookie.setPath("/");
27         languageCookie.setPath("/");
28
29         response.addCookie(themeCookie);
30         response.addCookie(languageCookie);
31
32         // Redirect to GET method
33
34         response.sendRedirect(request.getContextPath() + "/preferences");
35     }
36
37     protected void doGet(HttpServletRequest request, HttpServletResponse response)
38         throws ServletException, IOException {
39
40     }
```

```
43 Cookie[] cookies = request.getCookies();
44
45 if (cookies != null) {
46     for (Cookie c : cookies) {
47         if (c.getName().equals("theme")) {
48             theme = c.getValue();
49         }
50         if (c.getName().equals("language")) {
51             language = c.getValue();
52         }
53     }
54 }
55 response.setContentType("text/html");
56 PrintWriter out = response.getWriter();
57 String bgColor = "white";
58 String textColor = "black";
59
60 if (theme.equals("Dark")) {
61     bgColor = "black";
62     textColor = "white";
63 }
64 out.println("<html>");
65 out.println("<body style='background-color:" + bgColor + "; color:" + textColor + "');");
66 out.println("<h2>Your Saved Preferences</h2>");
67 out.println("<p><strong>Theme:</strong> " + theme + "</p>");
68 out.println("<p><strong>Language:</strong> " + language + "</p>");
69 out.println("<br>");
70 out.println("<a href='preferences.html'>Change Preferences</a>");
71 out.println("</body></html>");
72 }
73 }
```
